

# SANTIAGO QUEIROLO TANNAT

Ica Valley, Peru

## WINERY

---

Our Cañete vineyards are located on the desert coast of Peru alongside the Cañete River, 3.5 km from the coastline. The soil consists of sandy loam and alluvial subsoil with gravel. The climate is desert, seashore weather with sunny summers tempered by the proximity of the sea. Sea breezes provide mineral notes and complexity to our wines. We use gravity irrigation and harvest is done by hand.

|                     |                          |

| Alcohol Volume:     | 12%                      |

## TASTING NOTE

---

Intense garnet red. Its aromas are notably reminiscent of red and black fruits mixed with cherries and strawberries. In the mouth round and ripe tannins are present. Its natural total acidity is well balanced with fruit flavors. Good volume on the palate, long and tasty finish.
