TASTING NOTE

This mythical harvest, for exceptional vegetative development and unbeatable weather, which caused a highly optimal ripening, the grapes were selected prior to the process that was conducted by the traditional Rioja, ie stripping total, and controlling the temperature of fermentation to it did not exceed 30°C during this process. He stayed two years in American oak barrels with racking semester. All the processes of aging, both in barrel and in bottle, have been carried out in the drafts of the seventeenth century.
