

INTIPALKA PISCO ITALIA

Ica Valley, Peru

WINERY

Our Ica vineyards are located in the highlands of the Ica Valley, at the feet of the Andes Mountains, 60 Km from the coastline and over 500 meters above sea level. The soils are deep loam and the climate is desert weather, with fresh to chilly winters and sunny hot summers. Ica valley has a large thermal amplitude reaching differences of up to 20° Celsius between day and night, thus making this area a real oasis for ideal grape vine cultivation. We use drip irrigation and our harvest is done by hand.
